

I do not understand why you want to stop XM radio from offering traffic and weather information. This is not acceptable. If local station want to compete with XM they should change theirs broadcast habits. With traditional radio I have to listen to 10 minutes of radio ads before any traffic information during rush hours and this is not acceptable. I have the right to listen what I want!!! PLUS instant traffic & weather on XM adding security & safety in New York City (drivers are calm when they can know traffic situation).

Thank You,

Maciej Kruczkiewicz
